

4 x 4 Fill Panel

Controlling the flow of gases through your system is paramount for efficiency and safety. Brownie's fill panels are designed in a logical format with directional flowlines for easy recognition by the operator. Controls are easily manipulated and provide precise adjustments. All fittings, connectors, hardware and tubing are manufactured from the highest quality stainless steel for maximum safety and service life.

We have standard designs suitable for most applications. We can also design and build custom fill panels to meet any specialized need. If you have a gas control requirement, we can create the optimum solution.

Specifications

Connects to 4 storage banks, 4 fill whips, control valves, adjustable regulator, all stainless steel fittings/ connectors/tubing, stainless steel panel face with engraved flow diagram and starboard case.

Other: Digital/Analogue gauges
Finish: Stainless Steel
Part #: PNL4X4SS-R

OTHER AVAILABLE FILL PANELS

Output pressure can precisely adjusted to suit the cylinders being filled. The single gauge shows supply pressure from the compressor or storage bank. Adjustable pressure regulator, analog gauges, quick disconnect.

Specifications

Other: Analogue gauges
Part #: FP-ADJ

SCUBA/BA Fill Panel

Available to be placed locally or remotely, this panel allows the filling of both SCUBA and SCBA (BA) cylinders without the need for manually adjusting pressures. Preset regulators and differing fill outlets minimize the risk of overfilling and increase safety. The SCUBA outlet is regulated with a maximum pressure to prevent accidental overfilling. Also available is a non-adjustable Dual Pressure Fill Panel for filling SCUBA and SCBAs.

Specifications

Fitting: SCUBA or SCBA
Part #: FP-DP

Fireman Fill Station

Specialized SCBA fill stations can be installed and plumbed in the most strategic locations throughout the vessel. Constructed of King Starboard® material for maximum durability and to prevent damage to scba bottles. Designed to securely cradle a single or multiple bottle(s), with or without the backpack attached. Specify connection at time of order..

Specifications

Finish: King Starboard®
Part #: _____

Remote Fill Panel

Place a remote fill panel in the lazarette, near the swim platform, in the cockpit, or wherever convenience dictates. Now you can control your compressor and fill system without running below. Features flow control valve and stainless steel high-pressure quick disconnects.

Specifications

Fitting: SCUBA or SCBA
Part #: FP-DP
